DYNAMIC PROJECT OPERATIONS MANAGEMENT

CCm™ I significantly improves project realization success rate. Today, only 32% of projects are realized within time and budget. **CCm™ I** using Investment Service Catalogue accelerate project realization using real-time WO management with minimum administration and metrics of achieved results per phase.

MULTIPLE PROJECT MANAGEMENT

The key benefit using **CCm™ I** is support for a single PM team to manage multiple projects on various locations and sites at the same time. This competitive feature is realized by decomposing Project phases into predefined Investment Service Catalogue and execution Work Orders. Thus every Project is being realized under same process conditions and framework like production.

MULTIPLE VENDOR MANAGEMENT

Within multiple Project management feature **CCm™** is able to manage multiple Vendors within same or multiple projects. This unique capability offers huge Programs to be managed with high performance results and minimum administration. This feature is tested in practice on thousands of Investment WO being split among more than 100 various vendors. Efficiency and performance results shows extreme benefits.

INTEGRATION AND CONFIGURATION

Investment Management **CCm™ I** module integrated with **CCm™ M**, **CCm™ P**, **CCm™ S** and **CCm™ L** module supports identification of investment Project candidates using built in configurable Business Case evaluation. Integrated with ERP system **CCm™ I** offers full automated Investment management environment ending up with asset activation.
